PROFESSIONAL SUMMARY

Result-oriented Computer Science graduate with hands-on experience in Network Administration, Linux/Windows environments, and infrastructure support. Proven track record of monitoring network connectivity, troubleshooting system alerts, and automating tasks using Python and Bash. Fluent in English, experienced in cross-border environments, and highly adaptable to support distributed international teams.

TECHNICAL SKILLS

Operating Systems & SysAdmin: Linux (Ubuntu/Debian), Windows Server, Active Directory management, Bash & PowerShell scripting.

Networking & Protocols: TCP/IP, DNS, DHCP, VPN, SSH, Routing & Switching, Firewalls, network troubleshooting.

DevOps & Deployment: Docker, Git, GitHub Actions (CI/CD), Linux server environment configuration.

Automation & Scripting: Python (pandas, NumPy), Java, C#, Bash, REST APIs.

Databases & Security: SQL, PostgreSQL, secure access controls, system monitoring.

PROFESSIONAL EXPERIENCE

CUPET Company | Cuba

October 2025 - March 2026

Network Administration & Systems Technician

- Managed, maintained, and monitored the company's local network infrastructure (LAN/WLAN) ensuring 99.9% uptime.
- Performed advanced network connectivity troubleshooting (TCP/IP, DNS, DHCP, routing protocols) for internal infrastructure.
- Administered user accounts, access permissions, and security policies across mixed Windows and Linux environments.
- Provided Tier 1 and Tier 2 technical support for hardware, software, and network configuration issues, reducing resolution time.

ACADEMIC PROJECTS

Infrastructure & Automation Projects | Lead Developer / Administrator

- System Automation Scripts:** Developed custom Python and Bash scripts to automate routine system health checks, log analysis, and database backups (PostgreSQL).
- Dockerized Application Deployment:** Configured and deployed multiple academic software solutions (Asset Management, Healthcare Management) using Docker containers on Linux servers.
- Undergraduate Thesis (AI Integration):** Designed an application utilizing Large Language Models (LLMs) and APIs, gaining deep experience in deploying open-source models on dedicated server environments.

EDUCATION

Universidade da Coruña (UDC)

A Coruña, Spain

Master's Degree in Computer Engineering | In progress

Universidad Central "Martha Abreu" de Las Villas

Villa Clara, Cuba

Bachelor's Degree in Computer Science

LANGUAGES

English: Advanced / Fluent (Professional working proficiency for international teams).

Spanish: Native.

ACADEMIC RECOGNITION

- Participated and received a mention at the 52nd University Student Scientific Conference.
- Competed in the 2026 National Student Computing Competition (CNCEC).
